DETAILED ACTION

Status of Claims

1. Claims 1-3 are pending.
2. Claims 1-3 are rejected.

Information Disclosure Statement

3. The information disclosure statement filed June 25, 2003 fails to comply with 37 CFR 1.98(a)(1), which requires a list of all patents, publications, or other information submitted for consideration by the Office and 37 CFR 1.98(a)(2), which requires a legible copy of each U.S. and foreign patent; each publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. It has been placed in the application file, but the information referred to therein has not been considered. In particular, there are no copies provided for the foreign and non-patent literature references in this application. It has been placed in the application file, but the information referred to therein has not been considered.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 1-3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which

Art Unit: 1614

applicant regards as the invention. The following reason supports this rejection. The variable of X is defined as both "S, S(O)_n" and the variable of n is defined as "0 to 2." When the variable of n is 0 the variable of X is redundantly defined as being equal to the sulfur atom twice, which renders ambiguity to these claims. Accordingly, these claims are rendered vague and indefinite.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claim 3 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by Kanao et al. teach of amino acid derivatives of fluorene compounds, (see abstract and the ensuing structures). The instant claims comprise a larger genus than those disclosed in Kanao et al.
